SOAP NOTE — ANNUAL WELLNESS EXAMINATION

Note Type:	SOAP	Date of Visit:	2024-03-18
Patient:	Biscuit	Owner:	Jane Doe
Species:	Canine	Breed:	Golden Retriever
DOB:	2019-06-12	Weight:	28.4 kg

S — SUBJECTIVE

Owner Jane Doe presents Biscuit, a 4-year-old male neutered Golden Retriever, for his annual wellness examination. Owner reports the patient is eating well, active, and has had no vomiting, diarrhoea, coughing, or sneezing. Drinking and urinating normally. No known drug allergies. Up to date on heartworm prevention (last dose January 2024). Owner notes mild seasonal scratching around the face and paws but no skin lesions observed.

O — OBJECTIVE

General: BAR (Bright, Alert, Responsive). BCS 5/9. Coat in good condition. Weight: 28.4 kg (stable from last visit).

Vital Signs:

Parameter	Value	Reference Range	Status
Temperature	38.4 C	37.8–39.2 C	Normal
Heart rate	76 bpm	60–100 bpm	Normal
Respiratory rate	18 bpm	10–30 bpm	Normal
Mucous membranes	Pink, moist	Pink, moist	Normal
CRT	< 2 sec	< 2 sec	Normal

CV: Regular rhythm, no murmur. Resp: Clear bilaterally. Abdomen: Soft, non-painful. LN: No peripheral lymphadenopathy. MSK: Full ROM all limbs, no lameness. Eyes/Ears: Clear, no discharge. Dental: Grade 1 tartar, no gingivitis. Skin: Mild erythema between digits bilaterally — consistent with atopic dermatitis, mild.

A — ASSESSMENT

1. Annual wellness examination — no significant findings. 2. Mild atopic dermatitis (seasonal) — bilateral pedal erythema, no secondary infection. 3. Grade 1 dental tartar — monitor; dental cleaning recommended at next annual visit.

P — PLAN

- Administered: Rabies vaccine (3-year, PUREVAX), DHPP combination (Nobivac), Bordetella intranasal. - Heartworm test (IDEXX 4Dx PLUS): NEGATIVE for heartworm, Ehrlichia, Anaplasma, Lyme. - Prescribed: Cytopoint injection 30 mg SC for atopic dermatitis. Recheck if pruritus worsens. - Flea/tick prevention dispensed: Simparica Trio (3-month supply). - Owner educated on dental home care (brushing technique). - Next wellness exam: March 2025. Rabies booster due: March 2027.

EXPECTED CODING OUTPUT (test validation reference)

Expected Code	System	Category	Confidence Tier
Z00.00	ICD-10-CM	PREVENTIVE	HIGH

410620009	SNOMED-CT	PREVENTIVE	HIGH
L20.9	ICD-10-CM	DIAGNOSIS	HIGH
Z23	ICD-10-CM	PREVENTIVE	HIGH
K08.6	ICD-10-CM	DIAGNOSIS	MEDIUM

Test assertion: *requires_review* = false | *overall_confidence* = HIGH | *is_primary_diagnosis* on Z00.00 = true | atopic dermatitis NOT flagged as pre-existing
