BREED ASSESSMENT

	Declared (Policyholder)	Predicted (AI Vision)
Species	Canine	Canine
Breed	Labrador Mix	American Pit Bull Terrier Mix
Risk Tier	Tier 1 — Standard	Tier 5 — EXCLUDED
Confidence	—	54%
Consistency		AMBIGUOUS
Tier Delta		+4

Top-3 Breed Predictions:

Rank	Breed	Confidence	Risk Tier	Notes
1	American Pit Bull Terrier Mix	54%	Tier 5 — EXCLUDED	Tier 5 — EXCLUDED. Broad chest, jaw structure, head shape.
2	American Staffordshire Terrier	29%	Tier 5 — EXCLUDED	Tier 5 — EXCLUDED. Closely related morphology.
3	Labrador Mix	17%	Tier 1 — Standard	Declared breed. Lower probability given observed physical traits.

Visual Characteristics Identified:

Broad, blocky head with prominent zygomatic arch — consistent with bully-type breeds
Wide, deep chest and muscular shoulders
Short, smooth coat — brindle colouration
Medium-length muzzle, well-developed jaw muscles
Rose ears — characteristic of terrier-type breeds
Athletic, square body proportions inconsistent with Labrador body type

OUTCOME

Confidence below HIGH threshold and visual evidence suggests possible Tier 5 excluded breed morphology. Model confidence of 54% is insufficient to auto-accept or auto-decline. EXIF metadata absent — image source cannot be confirmed. Subject coverage borderline. Recommended actions for human underwriter: (1) Request a higher-resolution, well-lit photograph with EXIF metadata. (2) Request veterinary breed assessment certificate. (3) If bully-type breed is confirmed, decline policy under excluded breed clause. Policy issuance held pending review.
