Annual Wellness | 2020-07-15 | Paws & Claws Veterinary | Dr. L. Park | [p.2]

### S/O/A/P:

Annual wellness. Mochi 4 years old. Weight 5.8 kg. BCS 6/9 — slightly overweight. All systems normal. FVRCP + FeLV boosters. Dietary counselling given — reduce caloric intake.

Annual Wellness | 2021-07-20 | Paws & Claws Veterinary | Dr. L. Park | [p.4]

### S/O/A/P:

Annual wellness. Weight 6.4 kg — continued weight gain. BCS 7/9. Owner reports increased water intake noted intermittently over the past 2 months. Urinalysis ordered.

| Test             | Result   | Reference Range | Flag       |
|------------------|----------|-----------------|------------|
| Urinalysis — USG | 1.022    | > 1.020 (cats)  | Normal     |
| Urine glucose    | Negative | Negative        | Normal     |
| Urine protein    | Trace    | Negative        | Borderline |

A: Weight gain with mild PU/PD symptoms. USG and urine glucose normal — diabetes not supported at this time. Dietary management intensified. Low-calorie diet dispensed.

Sick Visit — Lethargy / PU/PD | 2022-09-10 | Paws & Claws Veterinary | Dr. L. Park | [p.7]

### S:

Owner reports Mochi lethargic for 1 week, drinking and urinating excessively, reduced appetite. Weight now 7.1 kg despite dietary management.

### O:

Weight 7.1 kg. BCS 8/9. Coat unkempt. T 38.1C. Plantigrade stance noted bilaterally.

| Test          | Result     | Reference Range | Flag   |
|---------------|------------|-----------------|--------|
| Blood glucose | 428 mg/dL  | 70–120 mg/dL    | HIGH   |
| Fructosamine  | 612 umol/L | 190–365 umol/L  | HIGH   |
| Urine glucose | 4+         | Negative        | HIGH   |
| Urine ketones | Negative   | Negative        | Normal |
| BUN           | 22 mg/dL   | 16–36 mg/dL     | Normal |

|                                                                                                                                                                            |           |               |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|---------------|--------|
| Creatinine                                                                                                                                                                 | 1.1 mg/dL | 0.8–1.8 mg/dL | Normal |
| PRE-EXISTING SIGNAL: DIABETES MELLITUS — explicitly diagnosed 2022-09-10. Policy start: 2024-07-01. Pre-existing confirmed (PE-01). First PU/PD symptoms noted 2021-07-20. |           |               |        |

A: Diabetes mellitus, newly diagnosed. Likely pre-diabetic state since mid-2021 (elevated BCS, PU/PD).

P:  
Vetsulin 1 IU SC BID initiated. Transition to diabetic diet (Hill's m/d). Owner trained on insulin administration. Glucose curves scheduled weekly.

Diabetic Recheck | 2023-01-14 | Paws & Claws Veterinary | Dr. L. Park | [p.11]

A / P:  
Diabetes mellitus — improving glycaemic control. Fructosamine 390 umol/L. Dose adjusted to 1.5 IU SC BID. Weight 6.2 kg — improved. Continue m/d diet.

PRE-EXISTING SIGNAL: DIABETES MELLITUS — ongoing (recurrence #2). Rule CD-01 triggered (chronic).

Diabetic Recheck + Wellness | 2023-08-05 | Paws & Claws Veterinary | Dr. L. Park | [p.14]

A / P:  
Diabetes mellitus — stable. Fructosamine 420 umol/L. Weight 6.0 kg. Mild dental tartar Grade 2 noted. No other findings. Continue current management.

Diabetic Recheck | 2024-03-22 | Paws & Claws Veterinary | Dr. L. Park | [p.17]

A / P:  
Diabetes mellitus — well-controlled. Fructosamine 380 umol/L. Weight stable 6.1 kg. Renal panel within normal limits. Continue Vetsulin 1.5 IU SC BID.

PRE-EXISTING SIGNAL: DIABETES MELLITUS — 4th occurrence across 19-month span. Chronic confirmed (CD-01).

EXPECTED REVIEW OUTPUT (test validation reference)

|                                                                                                  |
